

2.7 Living Situations

From the previous exercise, we learned which living situations may qualify a client as "literally homeless", "chronically homeless", and "at risk of homelessness".

Now, let's take a look at the categories in HMIS that we'll select for (Prior) Living Situation and see how that relates to being in "literally homeless" and "imminently at risk of homelessness" situations. Image 1 shows how the dropdown menu looks in HMIS.

So now you can see it's possible with the right information (which you now have) to accurately define a person's homeless status as well as their living situation in HMIS.

We highly recommend printing out the above image to keep it as a reference. To do so, either save and/or print this document or simply click on the image above and it will take you to a printable PDF version of the image.

Also, don't worry if you don't completely understand all the current living situations at this very moment. There are a lot of variables to consider. You'll have another opportunity to practice later in the course when you'll choose a "Current Living Situation" during the project exit.

Of course, if you have any questions, ask a supervisor or reach out to us at hmis@changinghomelessness.org and we can help!
